

# Visage®

Age is just number

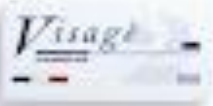

Visage® range of dermal fillers is a line of sterilized injectable hyaluronic Acid

which contain many types with different concentration of HA and the cross linking level

In particular, the particle size make each product different: the bigger the particle size, the higher the volumizing effect

# — Visage Products parameters —

| Types                                      | Meso                                                                                                                     | UN                                                                                | DEUX                                                                               | TROIS                                                                               |
